

Crystal Oscillators

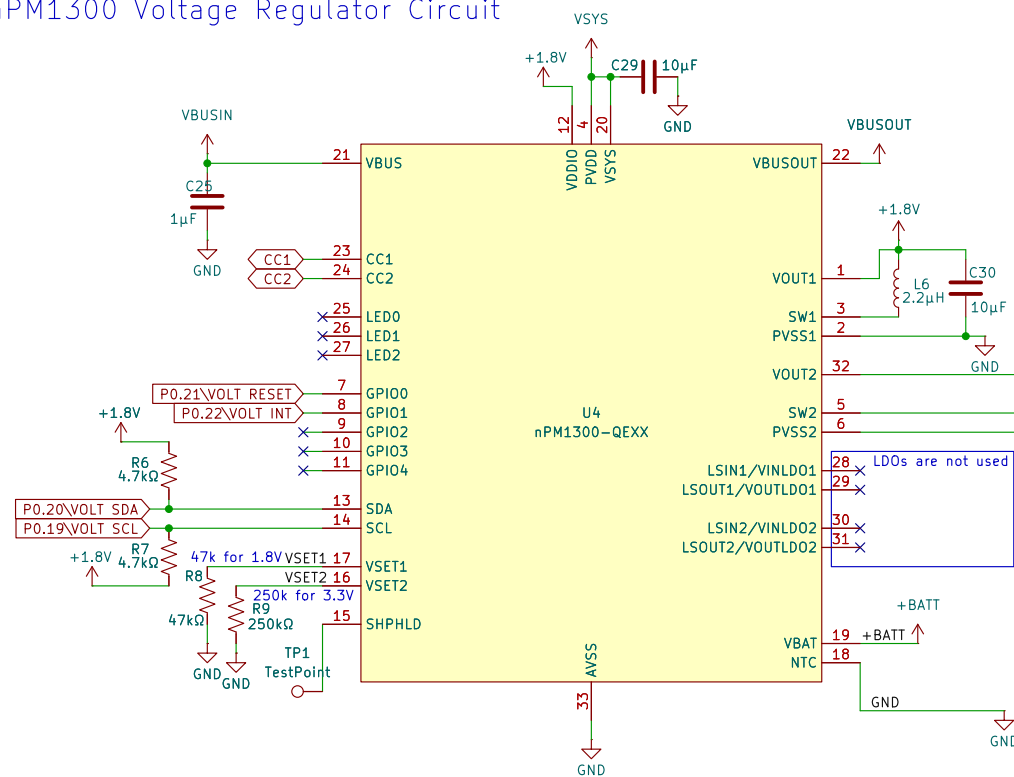

Pogo pin to external modules

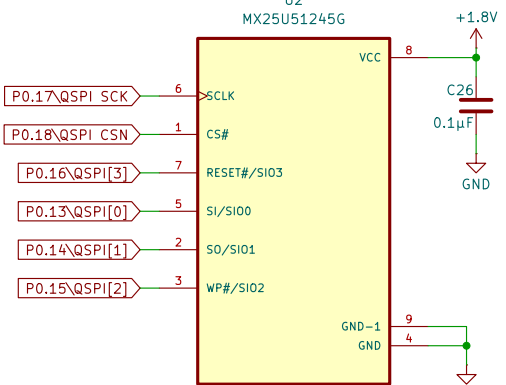

Main MCU decoupling

nPM1300 Voltage Regulator Circuit

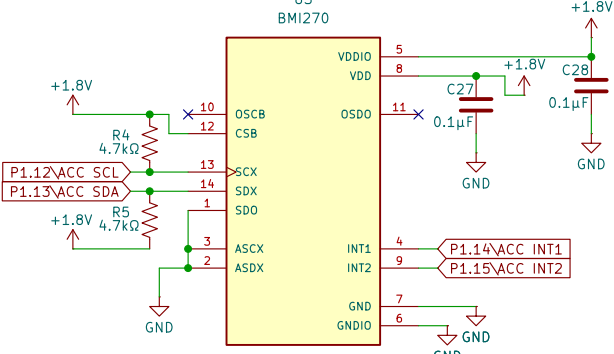

MX25U51245G flash memory

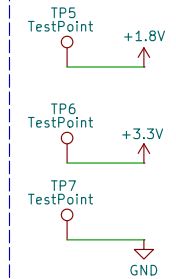

(The symbol is of the MX25L51245GZ2I-08G but since they have the same connections, footprint, we can use this symbol for both footprints)

BMI270 accelerometer

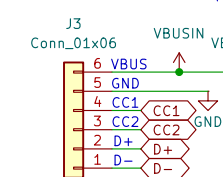

Pins left floating for redundancy while using I2C rather than SPI

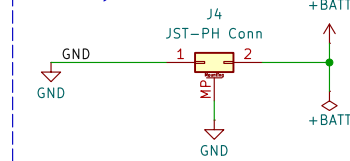

Power rail test points

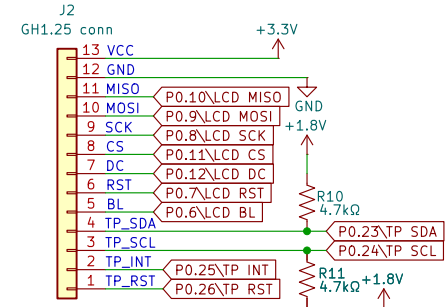

USB connection via pogo pins

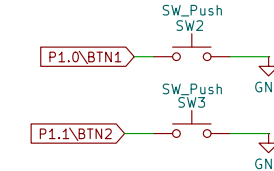

Battery connector

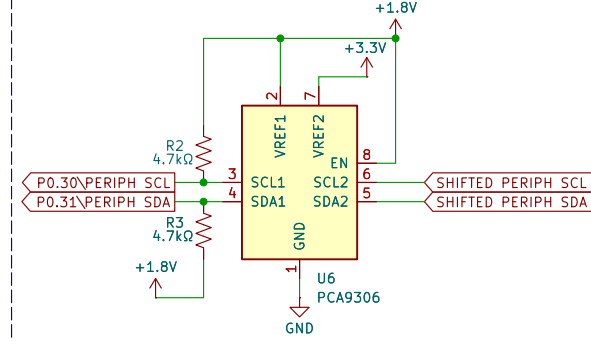

Screen and touch sensor connector

Physical Buttons

External modules level shifter
